PROJECT

Hardware & IoT

- **Personal VPN & NAS:** Utilized a Raspberry Pi Zero 2W to build a home lab, successfully configuring a personal VPN with PiVPN for secure network access and setting up a Network Attached Storage (NAS) for centralized file management.
- **Handheld Gaming Console (PiBoy):** Built a custom Python-based gaming and music device utilizing a Raspberry Pi Zero 2W, OLED display, PCM5102A DAC, and a hand-wired 4x2 button matrix.

AI-Assisted Projects

- **Dev Knowledge Hub** | learning-notes-ashy.vercel.app
  An organized collection of personal learning notes from various repositories, presented in a clean, user-friendly interface.
- **Receipt Generator**
  A utility website developed efficiently using AI tools to generate receipts.

Full-Stack Applications

- **Swoosh (WebRTC File Transfer) | Swoosh - Share Files Securely**
  A peer-to-peer file-sharing application enabling direct, secure, and fast data transfer between client browsers without intermediate server storage.
  Tech Stack: Node.js, ReactJS, Tailwind CSS.

- **Web-Based Chat App** | hi-chat-t4sd.onrender.com
  A real-time public chat application allowing users to sign up, log in, create profiles, and communicate in public rooms.
  Tech Stack: Node.js, HTML, Tailwind CSS, JavaScript.

- **Blog Web App** | react-blog-webapp.vercel.app
  A feature-rich blogging platform where users can create posts with images using a real-time text editor.
  Tech Stack: React, Appwrite (BaaS), React Router, Redux Toolkit (RTK), TinyMCE, React Hook Form.
